## Students association

The Physiotherapy students' association of the ENKRE is a non-profit association which offers, with the contributions of its partners, many services to the students and ENKRE alumni. One of its roles is to create cohesion between students through social events: cultural experiences, sports meetings, between-schools parties with other physiotherapy schools, solidarity events and tutoring and mentoring support between different classes.

## Presentation

Founded in 1968 with the aim to experiment new education methods and to improve physiotherapy training in France, the National School of Physiotherapy and Rehabilitation (**ENKRE**) is a public physiotherapy institute financed by the Regional Council of Ile de France. The school is managed by the Hospitals of Saint-Maurice. It is located close to Paris in the heart of this renowned establishment in the field of adult and child rehabilitation. It benefits from renovated premises in a historical setting and has a reference documentation center.

Each year, ENKRE welcomes about a hundred new first year students. Among of them, there are some "High Level Athletes", few overseas students already having a physiotherapist diploma and some extra "auditeurs libres" coming from other professions.

The school offers optimal material conditions for training, proposes a **professionalization curriculum** that is universalized and is open to **international mobility**.

Since 2017, ENKRE has been integrated, on educational and scientific levels, into the **Department of Physiotherapy** (DUFK/P) of the Kremlin-Bicêtre Faculty of Medicine of the University of Paris-Saclay.

Students obtain the French State Diploma of Physiotherapy required to practice in both **France** and **European Union** after a validated first year of university studies and four years of professionalizing university studies, one third of which is spent in internships in France and abroad.

The teaching staff is made up of highly qualified teachers from both the professional and academic fields. Six educational coordinators organise and manage the **initial and continuing education programs** supported by the school's project.

## Admissions

Since 2005-2006, the 1st year admission process in Physiotherapy is as follows: validation of 60 ECTS, whether it's at the end of a first university academic year in medical science: "Première année commune des études de santé (PACES)" or a university academic year in sports science: "Sciences et techniques des activités physiques et sportives (STAPS)".

Selected students are arranged in merit order by each university.

The number of admissions for the September 2021 school year : **105 places**

- **Admissions via PASS (specific health access pathway) or validated L1 Health**  
University of Paris : **18 admissions**  
Paris Saclay University : **10 admissions**  
UPEC University : **10 admissions**  
Sorbonne Paris Nord University : **6 admissions**
- **Admissions via L1 STAPS or validated L-AS STAPS**  
Faculty of Sports of Paris Saclay : **12 admissions**  
STAPS UPEC : **10 admissions**  
L-AS STAPS Sorbonne Paris Nord : **6 admissions**
- **Admissions via validated L1 (science portal) or validated L-AS 1 in biology**  
University of Paris Saclay science portal : **4 admissions** for validated L1 and **7 admissions** for validated L2  
Sorbonne Paris Nord University : **5 admissions**
- **Selection based on application of the Commission as High Level Athlete (SHN)**  
The number of dedicated admissions is subject to a request for authorisation from ENKRE's regional supervisors.
- **5 admissions** for paramedical and medical graduates, STAPS graduates and graduates recognised as having a master's degree.
- **2 admissions** for non-EU graduates

Our admissions are being modified for the 2022 year and the following years, in accordance with the provisions of the decree of the 17th January 2020 relating to the admissions into the institutes preparing for the Physiotherapy State diploma.

\* ECTS: European Credit Transfer System.  
1 Decree of the 16th June 2015 modified on 31 December 2015 relating to the admissions into the institutes preparing for the Physiotherapy State diploma.

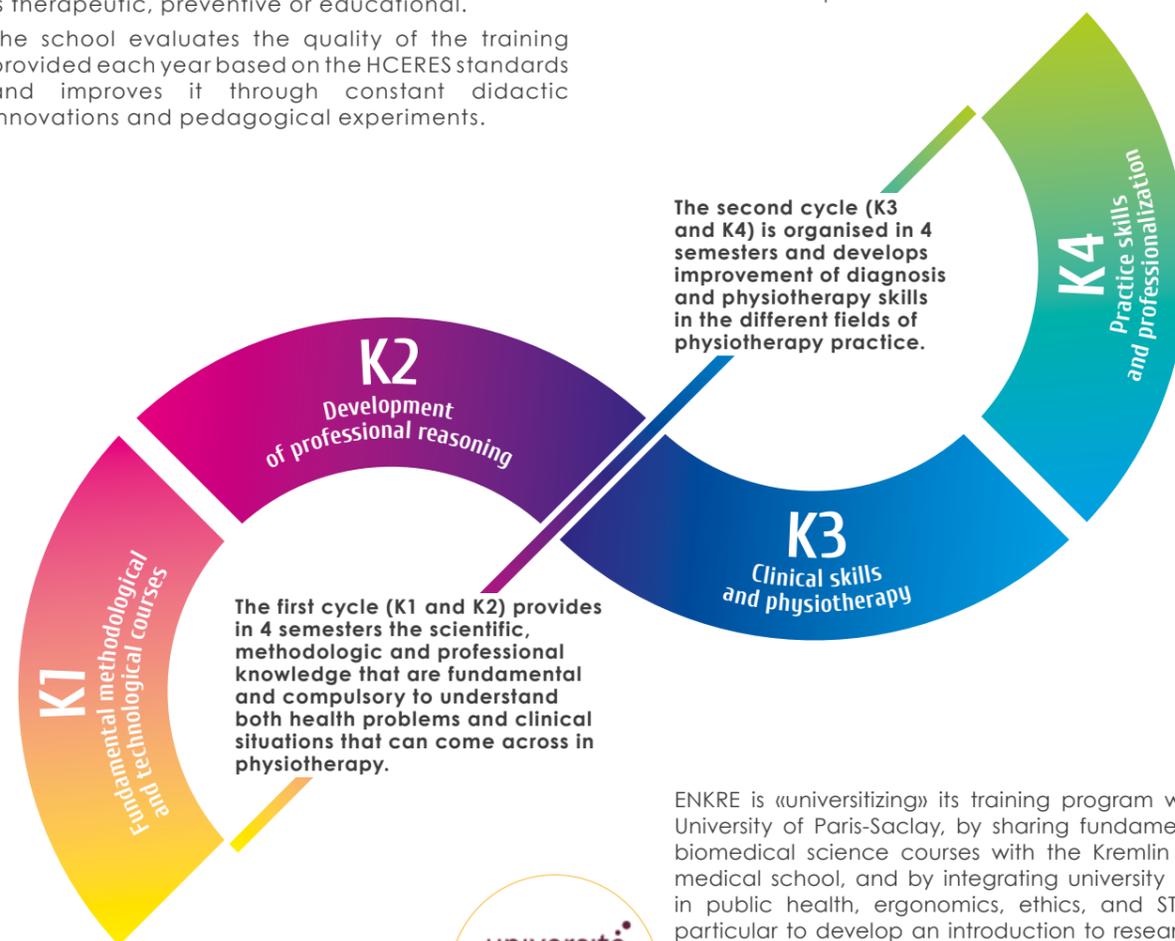

## Development of professional skills

Physiotherapists must practice with competence and quality intervention in order to respond to health needs of a patient, at all stages of the illness and at all ages of his life, whether the intervention is therapeutic, preventive or educational.

The school evaluates the quality of the training provided each year based on the HCERES standards and improves it through constant didactic innovations and pedagogical experiments.

## 4 years course duration of professional and university training

Training is organised and divided in two cycles, with rotations between university-based education and internships.

The first cycle (K1 and K2) provides in 4 semesters the scientific, methodologic and professional knowledge that are fundamental and compulsory to understand both health problems and clinical situations that can come across in physiotherapy.

The second cycle (K3 and K4) is organised in 4 semesters and develops improvement of diagnosis and physiotherapy skills in the different fields of physiotherapy practice.

FACULTÉ DE MÉDECINE

## Professional integration of high levels athletes

ENKRE admits high level sports athletes through an agreement with the National Institute of Sports, Expert Evaluation and Performance ("Institut National du Sport, de l'Expertise et de la Performance" INSEP) and Sports Federations. Athletes can benefit from :

- a double project : timetable arrangement in order to link professional studies and sports career.
- Professional career change at the end of the sports career.

## Department of Physical Therapy/Physiotherapy (DUFK/P)

The ENKRE organizes the educational and scientific integration of its training within the Faculty of Medicine of Kremlin-Bicêtre in the framework of the DUFK/P by developing a training project in Physical Therapy as recommended by the international authorities of the profession (WCPT World Confederation for Physical Therapy).

## Further education

Since September 2014, a university process that linked the ENKRE with the University of Paris-Sud Orsay, students have earned 60 + 240 ECTS in the same time of their Physiotherapist diploma.

Some opportunities to follow post-graduate education, such as a Master's degree are offered to students in partnership with the University of Paris-Sud Orsay and the other partner universities.
